[Antibacterial And Anti-Mite] This quilt can effectively inhibit harmful bacteria such as Escherichia coli after adding graphene, as if to build a layer of health protection film for the body surface.

[Strong Thermal Insulation Effect] Fills made of graphene are filled into the quilt to release far-infrared light waves to warm up, which can keep warm all night without plugging in electricity, bringing comfortable sleep in winter.

[Body Temperature Regulating] It keeps you warm in winter. The natural thermal regulator property of quilt provides a consistent temperature for sleep, and its great moisture absorption ability keeps your bed dry, thus withstanding most temperatures and seasons.

[Fixed Seam Design] Quilting positioning does not run cotton, and the inner core is tightly connected with the quilt cover.
