[EASY TO CARE, USE & SUPER DURABLE] The mattress topper is commercial machine washable and does not require expensive dry cleaning. Also, many other products use a non-woven fabric layer on the backside of the topper to reduce material cost, which causes damage if they flip the topper to the reverse side for utilization. But all front and back surface of our topper is made of very high-quality microfiber which assures both sides can be utilized, this increases the lifespan by double times

[PERSONALIZED CUSTOMIZATION] Please reach out to us with any questions or custom requirements for all products.
